

Traditional Testing Mindset

Expected inputs | Happy-path validation | "All tests pass = correct"

Verification Skills

Sojourner under Sabotage (Game)

- Write unit tests (JUnit)
- Achieve line coverage
 - Detect mutations
- Debug sabotaged code
- Scaffolded progression

Complementary

Exploration Skills

Fandango Workshop (CLI)

- Generate edge-case inputs
- Discover crashes automatically
 - Adversarial reasoning
- Crash & exception analysis
- Security-aware thinking

Exploratory Testing Mindset

Edge-case awareness + Adversarial reasoning + Robustness + Crash interpretation
